

How to build citizen participation and empowerment in environmental monitoring through access to open environmental data.

The workshop will focus on how to build citizen participation and empowerment for a more active contribution to Agenda 2030 through access to open data, drawing on international and local experiences.

It will also provide best practices on open data access, citizen participation and policy coherence for development among decision/makers.

The workshop is organized by MARS in partnership with the GAMA project and INECOL as part of the 'Semain de l'Education ou Development Durable' 2019, by the Cercle de Coopération of Luxembourg, this year focusing on Empowering Citizen for the Agenda 2030: <http://connectinglives.cercle.lu/programme-2019/>

Seminar program
