

INTERNSHIP: Guidelines for Covid-19 prevention measures

All interns should refer to the information from the Ministry of Health's website and the Government Council on 12 March 2020 in response to the Coronavirus.

<https://msan.gouvernement.lu/fr/dossiers/2020/corona-virus.html>

Interns who live in risk zones are invited to discuss remote working possibilities with their professional tutors and Head of HR (within the company).

The Faculty encourages employers and interns to proactively discuss individual arrangements in the framework of the internship.

Several options are offered:

1. Priority is given to allow interns for remote working and use skype for business, webex and other online tools;
2. To postpone the starting date of internship (from April) so that the results of the Internship Course can be provided before beginning of September;
3. To cancel the internship (**in very last option**), the student will receive a topic for writing a longer Bachelor/Master thesis covering the credits to be normally collected via the internship Course.

In this difficult period, I thank you in advance for your cooperation and your strict respect of the guidelines. They have been put into place not only for your own safety, but also for the safety of others.

Should you need additional information, please don't hesitate to contact me at the email address: nadege.meyer-hamy@uni.lu

Best regards,

Nadège Meyer-Hamy

Internship Specialist

CORONAVIRUS COVID-19 INFORMATION AND GUIDELINES

HOW TO PROTECT YOURSELF?

Wash your hands regularly and properly with water and soap.

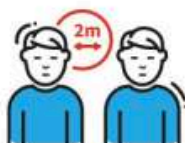

Cough or sneeze into the crease of the elbow or in a tissue.

Avoid shaking hands or kissing.

Avoid touching your face with your hands.

Avoid close contact with sick people.

Stay home if you are sick. Don't go to work or school.

WHAT ARE THE SYMPTOMS?

Symptoms resemble those of the flu. The infection remains mild for the majority of cases.

HOW DOES THE VIRUS SPREAD?

A normal mask does not protect against contamination.

The virus is spread via respiratory droplets expelled when a person coughs or sneezes.
