

### THE MACROECONOMICS OF AUTOMATION, ARTIFICIAL INTELLIGENCE, AND DIGITIZATION-part I

#### 1. Course details

Semester:	1
Credit rating:	2 ECTS
Pre-requisite(s):	The prerequisite for this course is Advanced Macroeconomics I of the Master in Economics and Finance (Research Track).
Lecturers:	Andreas Irmen (University of Luxembourg)
Administrator:	Roswitha Glorieux
Seminar times and rooms:	Wednesdays from 9:30am until 11:45 am
<b>Communications</b>	<b>It is important that students regularly read their University e-mails, as important information will be communicated this way.</b>
Reading week:	-
Mode of assessment:	oral exam and/or student presentations, and assignments
Additional work:	TBA
Examination Periods:	-
Course WebPage:	<a href="https://moodle.uni.lu">Moodle.uni.lu</a>

## 2. Aims and objectives

### Aims

The course Advanced Macroeconomics II of the Doctoral School in Economics and Finance connects students to the research frontier of modern Macroeconomics. It builds on and complements the PhD-training in Macroeconomics that begins with the course Advanced Macroeconomics I of the Master of Science in Quantitative Economics and Finance (MScQEF). The present syllabus presents **Block A** of Advanced Macroeconomics II. This block is concerned with recent advances in the theory of economic growth. Covered topics include theories of endogenous technical change with a particular emphasis on the recent literature on the role of automation, artificial intelligence, and digitization for economic growth and the distribution of incomes.

### Learning Objectives

Upon successful completion of this course students will be able to analyze and assess scientific contributions in the areas of Economic Growth and Dynamic Macroeconomics. They will master modern methodological concepts such as techniques of dynamic optimization, the analysis of complex dynamical systems, and dynamic general equilibrium theory. Moreover, they will be in a position to apply these concepts in their own research.

### Plan of semester

Overall this course comprises 30 hours, 22.5 hours of regular lectures and 7.5 hours of exercise lectures. We shall mix regular and exercise lectures in a balanced way. Exercise lectures will be based on assignments that you have to prepare in advance.

The first regular lecture will be on:  
Wednesday, September 23, 2020, 9:30-11:45, Room BLG001,

We will meet for regular or exercise lectures ten times, respectively, on Wednesdays at the indicated time and place. The last lecture will be on Wednesday, November 25, 2020.

There will be an oral exam of this course in January 2021. Details on this will be given later in class. Grading will be Pass or Fail. Passing the exam will earn you 2 ECTS.

## 3. Course details

1. Introduction: Exogenous Technical Change (Acemoglu (2009), Chapter 2)
2. Endogenous Growth through Expanding Product Varieties (Grossman and Helpman (1991), Chapter 3, Barro and Sala-i-Martin (2004), Chapter 6, Acemoglu (2009), Chapter 13)

3. Economic Growth and the Distribution of Income and Wealth (Bertola, Foellmi, and Zweimüller (2006), Chapter 10, Irmen and Tabakovic (2020))
4. Schumpeterian Growth (Grossman and Helpman (1991), Chapter 4, Barro and Sala-i-Martin (2004), Chapter 7, Acemoglu (2009), Chapter 14)
5. The Direction of Technological Change (Acemoglu (2003), Acemoglu (2009), Chapter 15, Irmen and Tabakovic (2017))
6. Automation and Economic Growth (Steigum (2011), Acemoglu and Restrepo (2018), Irmen (2020), Irmen (2020a))
7. Digitization, Artificial Intelligence, and Economic Growth (Goldfarb and Tucker (2017), Aghion, Jones, and Jones (2018),
