

Doctoral School in Economics and Finance

Course ID PhD Course: Topics in Inequality

1. Course details

Semester:	1
Credit rating:	2 ECTS
Teaching units	30
Pre-requisite(s):	No background is required.
Lecturers:	Conchita D'Ambrosio
Administrator:	Roswitha Glorieux
Tutors:	None
Seminar times and rooms:	please see Point 3
Tutorial times and rooms:	None
Communications	It is important that students should regularly read their University e-mails, as important information will normally be communicated this way and on Moodle.
Mode of assessment:	Attendance/Term paper
Examination Periods:	TBA
Course WebPage:	Moodle.uni.lu

2. Aims and objectives

The course will focus on the measurement and interpretation of inequality, its effects on individual well-being, behaviour and socio-economic outcomes.

In the lectures I will give, the students will be trained with the basic knowledge necessary to the analysis of inequality and related concepts. We will focus on the distribution of income, and study phenomena such as poverty, inequality, and polarization. We will tackle multidimensionality in welfare, and consider issues such as multidimensional inequality, poverty, and social exclusion.

The main questions we will answer are the following: What does it mean to be well-off (or deprived), how can societies make judgements and decisions about welfare, how can we compare well-being across people, and across time, what is meant by poverty, inequality, polarization, and income mobility, why poverty and inequality matter, and what is social exclusion and deprivation?

This course will tackle both the theoretical as well as the empirical issues surrounding these concepts.

3. Plan of semester

The lectures will be given remotely via Webex in January and February 2022, tentative dates

28 February 14h30-17h30

1 March 14h30-17h30

8 March 14h30-17h30

9 March 14h30-17h30

11 March 14h30-17h30

15 March 14h30-17h30

17 March 14h30-17h30

18 March 14h30-17h30

4. Course details

- Inequality: Basic principles
 - Examples of inequality indices
 - Orderings of distributions by inequality indices
- Inequality and welfare: Relative case
 - Interpretations of relative case
 - Absolute case
 - Interpretations of absolute case
 - Relate indices to social welfare functions
 - Dasgupta-Sen-Starrett theorems
- Generalized Lorenz curve
- Decomposition of inequality
- Poverty: Basic principles
 - Sen and extensions of Sen
 - Alternative indices (Censored income distributions)
 - Poverty orderings: Foster-Shorrocks
 - Poverty and time
- Polarization: Basic principles
 - Orderings of distributions by polarization indices
- Deprivation: Problem
 - Indices
 - Deprivation and income satisfaction (Interdependent preferences)

- Multidimensional Issues
Formulation of the problem: why multidimensionality
Social exclusion and deprivation
- Mobility: Problem
Indices
